MERN Stack Web Developer	(Mongodb, Express.js, React.js, Node.js)
Web Technologies	HTML, CSS, JavaScript
Programming Language	C, Python, JavaScript
FrameWork	Bootstrap
Designing Tool	Figma

EXPERIENCE

Fresher

PROJECTS

1. **Analysis of NYPD Vehicle Collision.** This Project mainly shows the data of the number of deaths and injuries that occure in accidents in those cities and the cause of those deaths and injuries.

role:- Visualization and Analyzing of Data in IBM COGNOS.

2. **Pixel Panorama.** The project aimed to develop a visually appealing and user-friendly website inspired by Pinterest. The website allows users to create and share collections of images, fostering a sense of community and creativity. The theme of this project revolves around visual discovery and inspiration.

Technology:- The technology stack chosen for this endeavor includes HTML, CSS, Node.js, Express.js, middleware, Express Generator, MongoDB, and a range of authentication and authorization tools such as Passport, Passport-Local, Passport-Local-Mongoose, and Express Session.

3. **Network Traffic Analyser.** Network traffic analysis involves monitoring and analyzing network data to identify and address security threats, performance issues, and more. I used Python for this project which offers a range of powerful tools to perform this analysis effectively.

4. **UI/UX Designer.** I have designed many web pages and I also designed a concept design for INKRONIX SOFTWARES.

Designing Tool:- Figma.

5. **Frontend Development.** I have developed many clone web pages, like:- Spotify, Snapchat, Instagram, Cochon Restaurant New Orleans and many more these are the highlights..
